THE **BB** SOLUTION

FOR DIFFERENT TEXTILE APPLICATION

Bio-Based products are designed on renewable materials.

Can represent **alternative sources to fossil fuels**, reduce the carbon footprint or produce **new products** using the **unique properties** of organic matter.

The **Bio-Based** term refers to materials and products that are **wholly or partially** derived **from biomass**, such as plants and vegetables.

PRE-TREATMENT & DYEING

NEARCHEL BB-50

Sequestering and dispersing agent based on renewable sources.
Suitable for bleaching, dyeing and soaping processes

60 %
BIO-CONTENT

Water repellent agent, PFA & fluorine free. It gives WR performance with a good durability to wet washing and dry cleaning

50 %
BIO-CONTENT

NEARFINISH WI-REN

Softness & comfort based on renewable sources, comes from by-product of agro processing.
Adding wicking properties for a Cool&-Dry effect during wearing of the garment

45 %
BIO-CONTENT

NEARSOPHT 538

Tender & soft handle feeling to the fibers based on rapeseed sources.
It is able to confers anti-static properties

80 %
BIO-CONTENT

NEARSOPHT SFP 100

Soft and swollen touch based on vegetal renewable sources. It confers anti-static properties

75 %
BIO-CONTENT

COATING & PRINTING

NEARCOAT BB-AC

Acrylic bio-based emulsion at high concentration

Self crosslinking binder with medium softness

Designed mainly for coating and printing application with Nearstone D serie of pigment

Good durability at wet washing

30 %
BIO-CONTENT

NEARCOAT BB-PU HC

Polyurethane bio-based dispersion

Soft handle with high elastic properties

Designed mainly for coating and printing application. Can be used in transparent and in colored version with Nearstone D serie of pigment

Excellent durability at wet washing and dry cleaning

70 %
